1. Application overview

The “Wolt” App is an incredibly popular platform to order food from in Israel, especially but not solely, for employees in the tech industry using prepaid options such as “Cibus” cards. Interestingly enough, the app was originally kicked off in Finland, and includes 30 countries to date, according to this report from 10.10.24:

<https://press.wolt.com/en-WW/242211-wolt-turns-10-supporting-19-billion-in-economic-activity-over-a-decade>

According to that article, Wolt has handled 19 billion Euros, 80% of its activity is related to food orders and the other 20% to a multitude of stores. It also just recently celebrated its 10'th anniversary, so happy birthday Wolt!

2. Purpose

This document presents the various stages performed as part of the Testing of the “Wolt” App. These stages were needed in order to check for any critical bugs, to assess the usability and user experience of the app, its suitability as a prime source of ordering food and food related items, etc. Additional attention was dedicated to examining the majority of ordering and sharing information via 3'rd party options.

The tests focused on the performance of the app including navigating through the large selection of restaurants, browsing the stores by categories, adding, viewing and editing various items from the cart, searching for deals, changing locations and networks, ordering with friends and discovering new options. It also just recently celebrated its 10'th anniversary, so happy birthday Wolt!

3. Testing Scope

a. In Scope

Functional Testing for the following modules was in Scope of Testing:

- **Discovery**
- Other Stores
- Order again
- Delivery fee
- **Restaurants**
- All restaurants
- See all
- Location and Airplane mode

- Street Food
- Kosher
- Vegan
- Burger
- Pizza
- Ice cream
- **Stores**
- Grocery
- Meat & Fish
- Street Food
- Alcohol
- Electronics
- Books
- etc.
- **Search**
- **Profile**
- Country
- Profile picture
- Email
- Number
- Delete account
- Send receipts to email
- Terms of service
- Accessibility statement
- Privacy Statement

4. Type of Testing performed

1. Functional testing:

Positive - Testing every section of the app, that every section's links work, leads to accurate information, that moving between stores and sections is smooth and quick. Testing that purchasing various products from multiple stores is possible, that adding, editing, viewing and deleting information and products is possible and that the user experience is good.

Negative – attempting to order and purchase products, to search and find information on stores and restaurants is not possible when airplane mode is turned on.

2. Accessibility Testing:

Examining the functionality of the app, trying to change the display from vertical to horizontal and increasing and decreasing screen size, due to the accessibility requirements.

3. Sanity Testing:

Conducting quick tests to verify that specific functionalities work.

4. Internationalization testing:

Changing and applying different languages to the app, checking that the currency changes as well and that different deals are still displayed.

5. Survival & Recovery Testing:

Evaluating the app's ability to recover from being turned off and on, from turning Airplane mode off and on, uninstalling and reinstalling it and checking whether the basic user information was recovered.

6. Interfaces Testing:

Testing that at least 80% of information sent via the “order together” option is sent and received correctly by users on 3'rd party platforms (WhatsApp, Facebook Messenger Chat, etc).

a. Out of Scope

Compatibility Testing, Security Testing, Accessibility testing

b. Items not tested

Wolt's website, not all sharing options, no Load & Stress testing

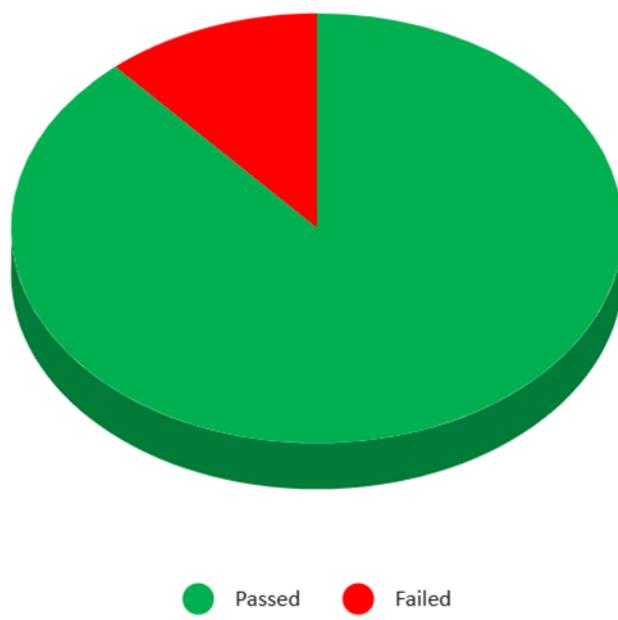

5. Metrics

<Metrics will help to understand the test execution results, status of test cases & defects etc. Required Metrics can be added as necessary. Example: Defect Summary-Severity wise; Defect Distribution-Function/Module wise; Defect Ageing etc. Charts/Graphs can be attached for better visual representation>

d. No. of test cases planned vs executed

d. No. of test cases passed/failed

Passed	Failed	Not Run	Total
278	36	0	314

Test Planned	Test executed	Test passes	Test Failed
314	314	278	36

f. No of defects identified and their Status & Severity

	Critical	Major	Medium	Cosmetic	Total

Closed	0	0	0	0	0
Open	0	2	17	23	42
				42	

g. Defects distribution – module wise

S-1 ST	S-2 Critical	S-3 Major	S-4 Medium	S-5 Low	Total
0	0	2	17	23	42

All Bugs - Status vs Severity

6. Test Environment & Tools

Application URL	https://play.google.com/store/apps/details?id=com.wolt.android
App version	24.42.0, 24.46.0
Phone Model	OnePlus Nord2 Android 13, iPhone 12, iOS 14

7. Lessons Learnt

S. No	Issues faced	Solutions
1	Display and sorting of stores was confusing, not user friendly. It seemed as though some of the process was done without enough thought, even with age-restricted products.	In any case where I thought appropriate, I did consider there to be UI\UX bugs, but suggested a different category for specific products, and I do believe some of them could easily be altered to the benefit of current and future users.
2	When using the app in Airplane mode, most of the sections were either completely blocked, displayed very minimal information to me as a user, or even caused the app to crash.	This challenge was also represented as bugs, especially those in the earlier version that caused the app to freeze and crash. In version 24.26 the “Search” section is displayed which is better than before. If at least 2-3 sections would be functioning while in this mode, it would make a big difference.
3	Redeeming codes purchased in the gift card store was extremely difficult instead of being simple and intuitive, and it even required spending over an hour on the chat with a customer support representative.	I understand that security of codes and funds in such an app is of vital importance. What could possibly help solve some of this problem would be either a universal code sent by a representative over chat after identification and then handled internally, or some other workaround that would not cause the average user to get extremely frustrated and perhaps to even leave the app for a shorter or longer period of time.

8. Recommendations

- When entering the app, pop-ups appear immediately. I understand the need to market new deals or offers, but I did feel it put pressure on me that I could have done without. If possible, the timing of such pop-ups should be thought about again, and perhaps more personalized suggestions would bolster users' experience in a positive way.
- "Stores" section- I as a user found this section to be rather confusing with several non-relevant options and stores closing within a few minutes appearing without a good reason. Consider re-sorting some of the categories, especially the one that probably should be age-restricted. In addition, most users won't necessarily update their app if it works okay, so depending on internal statistics, evaluate where and when this can be fixed in older versions.
- The "Order together" option is definitely a welcome one, since many people order for significant others or colleagues. However, this option didn't divide the sum in a logical way, thus caving it in. While it might not be one of the most used features in the app, it is a way to socially attract more business, and perhaps not incredibly challenging to fix and use more often. The newer version of the app is smoother, and with specific areas fixed, its older siblings and itself are concluded as a go.

9. Exit Criteria

- a. All test cases should be executed – **Yes**
- b. All defects in Major, Medium severity- especially in "Stores, gift cards, and Location sections, should be examined and offered solutions within 30 days, **Yes**.
- c. No Major or medium bugs found in the past 3 days- **Must**.

10. Conclusion/Sign Off

Following in depth testing of the vast majority of the app's sections, I have reached these conclusions. The main functionalities of the website including selecting stores, products, moving between sections, ordering ahead of time and in quantity, sharing information to 3'rd party platforms etc, all work well enough for the average user. While bugs in these sections were found, they don't critically affect the main purposes and actions the app was designed to perform. As the Exit criteria was met and satisfied as mentioned in Section 7, **this app is suggested to 'Go Live'** by the Testing team. Appropriate User/Business acceptance testing should be performed before 'Go Live'.

Sample Test Summary Report Created and published by: <http://SoftwareTestingHelp.com>

11. STD

CID	Title	Priority	Section	Tested On	Status
T1	Check that a logged in user can start, complete and confirm delivery of an order on the app for the standard 40-50 minutes ahead of time	Medium	General	12/3/2024 8:03 PM	Passed
T2	Check that a user can start, complete and confirm delivery of an order on the app for 2 hours ahead of time	Medium	General	12/3/2024 8:03 PM	Passed
T3	Check that a user can start, complete and confirm delivery of an order on the app for for 24 hours ahead of time	Medium	General	12/3/2024 8:03 PM	Passed
T4	Check that a user can log into the app with a valid email address, yeever@walla.com	Medium	General	12/3/2024 8:03 PM	Passed
T5	Check that the font size is clear enough to read clearly for the average user	Medium	General	12/3/2024 8:03 PM	Passed
T6	Check the font colors and background are the same size and design across the app's sections	Medium	General	12/3/2024 8:03 PM	Passed
T7	Check that a logged in user can log out easily and quickly	Medium	General	12/3/2024 8:03 PM	Passed
T8	Check that a user can start, complete and confirm delivery of an order in the app from 8-10am local time	Medium	General	12/3/2024 8:04 PM	Passed
T9	Check that a user can start, complete and confirm delivery of an order in the app from 13-15pm local time	Medium	General	12/3/2024 8:04 PM	Failed
T10	Check that a user can start, complete and confirm delivery of an order in the app between 20-23pm local time	Medium	General	12/3/2024 8:04 PM	Failed
T11	Check that a different user logging into the app, can only see their own personal information	Medium	General	12/3/2024 8:05 PM	Passed
T12	Check that a user with enabled location can start, complete and confirm delivery of an order on the app for 30 minutes ahead of time	Medium	Location	12/3/2024 8:05 PM	Passed
T13	Check that a user with enabled location can start, complete and confirm delivery of an order on the app for 2 hours ahead of time	Medium	Location	12/3/2024 8:05 PM	Passed
T14	Check that a user with enabled location can start, complete and confirm delivery of an order on the app for 24 hours ahead of time	Medium	Location	12/3/2024 8:05 PM	Passed
T15	Check that a user with enabled location can start, complete and confirm pickup of an order within the default 10-30 minutes	Medium	Location	12/3/2024 8:05 PM	Passed

T16	Check that a user with enabled location can start, complete and confirm pickup of an order for 24 hours ahead of time	Medium	Location	12/3/2024 8:05 PM	Passed
T17	Check that the "Choose your location" icon is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T18	Check that the "Choose your location" icon leads to the Location section on the app	Medium	Location	12/3/2024 8:05 PM	Passed
T19	Check that the "Use my current location" icon option is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T20	Check that the "Use my current location" option is possible to use without the GPS system being enabled	Medium	Location	12/3/2024 8:05 PM	Passed
T21	Check that the "Home" icon and address in the location section, accept valid information- Bruriya 6 street, Ramat Gan	Medium	Location	12/3/2024 8:05 PM	Passed
T22	Check that the "Home" icon and address in the location section, accept valid information- Bruriya 8 street, Ramat Gan	Medium	Location	12/3/2024 8:05 PM	Passed
T23	Check that the "Work" location in the location section is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T24	Check that the "Home" location in the location section accepts valid information- HaMasger 27 street, Tel Aviv	Medium	Location	12/3/2024 8:05 PM	Passed
T25	Check that the "Choose a new address" icon is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T26	Check that the "Choose a new address" icon allows the user to start and complete the process of choosing an additional location	Medium	Location	12/3/2024 8:05 PM	Passed
T27	Check that the "Browse all Wolt Cities" icon is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T28	Check that the "Browse all Wolt Cities" icon leads to viewing at least 5 other cities in Israel	Medium	Location	12/3/2024 8:05 PM	Passed
T29	Check that the "Explore other Wolt countries" line is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T30	Check that the "Jerusalem" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T31	Check that the "Jerusalem" button on the "Select Wolt City" leads to the correct city	Medium	Location	12/3/2024 8:05 PM	Passed
T32	Check that the "TLV- Herzliya area" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T33	Check that the "TLV- Herzliya area" button in the "Select Wolt City" leads to the correct city	Medium	Location	12/3/2024 8:05 PM	Passed
T34	Check that the "Eilat" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T35	Check that the "Eilat" button in the "Select Wolt City" leads to the correct city	Medium	Location	12/3/2024 8:05 PM	Passed
T36	Check that the "Haifa & HaKrayot" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T37	Check that the "Haifa & HaKrayot" button in the "Select Wolt City" leads to the correct city	Medium	Location	12/3/2024 8:05 PM	Passed

T38	Check that the "Netanya area" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T39	Check that the "Netanya area" button in the "Select Wolt City" leads to the correct area	Medium	Location	12/3/2024 8:05 PM	Passed
T40	Check that the "Be'er Sheva" button in the "Select Wolt City" is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T41	Check that the "Be'er Sheva" button in the "Select Wolt City" leads to the correct city	Medium	Location	12/3/2024 8:05 PM	Passed
T42	Check that the transfer from one city to a different city in Israel is executed in under 10 seconds	Medium	Location	12/3/2024 8:05 PM	Passed
T43	Check the "Explore Wolt countries" button is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T44	Check the "Explore Wolt countries" leads to a page with international selection options	Medium	Location	12/3/2024 8:05 PM	Passed
T45	Check that the "Finland" country button is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T46	Check that the "Finland" country button leads to cities in Finland	Medium	Location	12/3/2024 8:05 PM	Passed
T47	Check that the "Germany" country button is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T48	Check that the "Germany" country button leads to cities in Germany	Medium	Location	12/3/2024 8:05 PM	Passed
T49	Check that the "Japan" country button is clickable	Medium	Location	12/3/2024 8:05 PM	Passed
T50	Check that the "Japan" country button leads to cities in Japan	Medium	Location	12/3/2024 8:05 PM	Passed
T51	Check that selecting a restaurant with airplane mode on pops up a location problem	Medium	Location	12/3/2024 8:05 PM	Passed
T52	Check that transferring from a Wifi network to Mobile data doesn't negatively affect the app's performance	Medium	Location	12/3/2024 8:05 PM	Passed
T53	Check that Sukkot deal order items for 70 NIS and pay only 20 is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T54	Check that Sukkot deal order items for 70 NIS and pay only 20 is calculated correctly and reflected in the order	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T55	Check that 0 NIS delivery fee is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T56	Check that 0 NIS delivery fee is calculated correctly reflected in the order	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T57	Check that sharing a specific restaurant via "Nearby Share" through WhatsApp is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T58	Check that sharing a specific restaurant via "Nearby Share" through WhatsApp is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T59	Check that sharing a specific restaurant via "Nearby Share" through WhatsApp is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T60	Check that sharing a specific restaurant via "Nearby Share" through WhatsApp enables	Medium	Restaurants	12/3/2024 8:08 PM	Passed

	another user to enter the exact restaurant name and location sent to them				
T61	Check that sharing a specific restaurant via "Nearby Share" through Gmail is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T62	Check that sharing a specific restaurant via "Nearby Share" through Gmail is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T63	Check that sharing a specific restaurant via "Nearby Share" through Gmail is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T64	Check that sharing a specific restaurant via "Nearby Share" through Gmail enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T65	Check that sharing a specific restaurant via "Nearby Share", through Messenger Chats is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T66	Check that sharing a specific restaurant via "Nearby Share" through Messenger Chats is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T67	Check that sharing a specific restaurant via "Nearby Share" through Messenger Chats is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T68	Check that sharing a specific restaurant via "Nearby Share" through Messenger Chats enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T69	Check that sharing a specific restaurant via "Nearby Share" through Chrome browser is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T70	Check that sharing a specific restaurant via "Nearby Share" through Chrome browser enables the user to reach the exact restaurant link	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T71	Check that sharing a specific restaurant via "Nearby Share" through Facebook News Feed is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T72	Check that sharing a specific restaurant via "Nearby Share" through Facebook News Feed posts the exact Restaurant's information on the user's News Feed	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T73	Check that sharing a specific restaurant via "Nearby Share" through LinkedIn private message is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T74	Check that sharing a specific restaurant via "Nearby Share" through LinkedIn Private message is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T75	Check that sharing a specific restaurant via "Nearby Share" through LinkedIn Private message is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T76	Check that sharing a specific restaurant via "Nearby Share" through LinkedIn private message enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed

T77	Check that sharing a specific restaurant via "Nearby Share" through Telegram is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T78	Check that sharing a specific restaurant via "Nearby Share" through Telegram is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T79	Check that sharing a specific restaurant via "Nearby Share" through Telegram is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T80	Check that sharing a specific restaurant via "Nearby Share" through Telegram enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T81	Check that sharing a specific restaurant via Nearby Share through Google Keep is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T82	Check that sharing a specific restaurant via "Nearby Share" through Google Keep is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T83	Check that sharing a specific restaurant via "Nearby Share" through Google Keep is able to be saved on Google Keep	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T84	Check that sharing a specific restaurant via "Nearby Share" through Google Keep is able to be saved on multiple email addresses	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T85	Check that sharing a specific restaurant via "Nearby Share" through Discord is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T86	Check that sharing a specific restaurant via "Nearby Share" through Discord is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T87	Check that sharing a specific restaurant via "Nearby Share" through Discord enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T88	Check that sharing a specific restaurant via "Nearby Share" through Google Messages is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T89	Check that sharing a specific restaurant via "Nearby Share" through Google Messages is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T90	Check that sharing a specific restaurant via "Nearby Share" through Google Messages is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T91	Check that sharing a specific restaurant via "Nearby Share" through Google Messages enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T92	Check that sharing a specific restaurant via "Nearby Share" through Slack is clickable	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T93	Check that sharing a specific restaurant via "Nearby Share" through Slack is able to be sent	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T94	Check that sharing a specific restaurant via "Nearby Share" through Slack is able to be received	Medium	Restaurants	12/3/2024 8:08 PM	Passed

T95	Check that sharing a specific restaurant via "Nearby Share" through Slack enables another user to enter the exact restaurant sent to them	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T96	Check that restaurants and stores names can be translated to English, Arabic, French and Russian	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T97	Check that restaurants and stores names can be translated to German, Spanish, Finnish and Japanese	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T98	Check that menu details can be translated via Automatic translations to English, Arabic, French and Russian	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T99	Check that restaurant, store names and menus saved in English, Arabic, French and or Russian remain saved in those languages unless manually changed	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T100	Check that a restaurant closing within 15 minutes from clicking on it pops up a timing warning to the user	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T101	Check that all restaurants display their star rating clearly, starting from the highest to the lowest	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T102	Check that all restaurants display their approximate delivery time clearly	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T103	Check that all restaurants display their order fee clearly	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T104	Check that Kosher restaurants display that information clearly	Medium	Restaurants	12/3/2024 8:27 PM	Failed
T105	Check that all restaurants listed display their 2 NIS automatic fee clearly	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T106	Check that Vegan restaurants display that information clearly	Medium	Restaurants	12/3/2024 8:28 PM	Failed
T107	Check that Restaurants display their price range according to the app's filters	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T108	Check that the ""Street Food"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T109	Check that the ""Ice cream"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T110	Check that the ""Central Asian"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T111	Check that the ""Soup"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T112	Check that the ""Curry"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T113	Check that the ""Kosher for Passover"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T114	Check that the ""Bakery"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T115	Check that the ""French"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T116	Check that the ""Fish"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed

T117	Check that the ""Greek"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T118	Check that the ""Salad"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T119	Check that the ""Gluten-free"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T120	Check that the ""Persian"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T121	Check that the ""Sandwich"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T122	Check that the ""Healthy"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T123	Check that the ""Tapioca"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed
T124	Check that the ""Mediterranean"" filter is clickable and applicable to restaurants	Medium	Restaurants	12/3/2024 8:08 PM	Passed

[WMAP-2] No change display option from vertical to horizontal on iPhone

Created: 14/11/24

Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Low
Reporter:	Yaniv R	Assignee:	Yaniv R
Environment:	iPhone 12 iOS 14 Wolt version 24.42.0		
Severity:	Medium		

Description:

Steps to replicate:

- 1- Make sure your iPhone display setting allow changing the screen display from horizontal to vertical.
- 2- Enter the app, try to tilt your phone form vertical display to horizontal display.

Actual result- the screen display remains vertical.

Expected Result- the screen display should change as it does in many apps.
No attachment needed.

[WMAP-3] [No change display option vertical-horizontal on Android phone](#)

Severity:	Medium		

Description

Steps to replicate:

- 1- Make sure your iPhone display setting allow changing the screen display from horizontal to vertical. Open the Wolt app
- 2- Open the Wolt app.
- 3- Turn your Android phone Horizontally

Actual result- the screen display stays vertical.

Expected Result- the screen display should change as it does in many apps.

[WMAP-4] [No option to increase screen size with fingers on iPhone](#)

Created: 14/11/2024

Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Low
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		

Environment:	iPhone 12 iOS 14. Wolt version 24.42.0
Severity:	Medium

Description

Steps to replicate:

- 1- Go into the app
- 2- Select “Meshek Barzilay” restaurant.
- 3- Use 2 fingers and slide them apart to increase screen size.
- 4- Try the same action in “Burger Station” and other restaurants.

Actual result- the screen size stays exactly the same.

Expected Result- the screen size should increase, especially to help visually impaired users.
No attachment needed.

[WMAP-8] [Pizza "Agvania" enables selecting no toppings, then selecting toppings anyway](#)

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Low
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	iPhone 12 iOS 14. Wolt version 24.42.0		
Severity:	Low		

Description

Steps to replicate:

- 1- Select location “Haifa”, and store “Pizza Agvania”.

2- Select “Large pizza” option.

3- Select “no topping” on pizza option, then “topping on first half” option.

4- Selecting toppings on first half such as olives, corn and tomatoes.

5- Continue with your order.

Actual result- When selecting “no topping”, the app still allows adding toppings with no pop up and to order it.

Expected result- The app should forbid the users from adding toppings, as they selected the no topping option.

[WMAP-12] Limited ordering even when not during rush hour

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Medium
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 Android 13 Wolt version 24.42.0		
Severity:	Medium		

Description

Steps to replicate:

- 1- Enter the app after 10PM.
- 2- Select location “Ramat Gan, Bruriya street 6”.
- 3- Select “Discovery” tab

Actual result- The app immediately pops up a message stating the limited hours issue, preventing the users from ordering for a time.

Expected result- The app should not prevent users from ordering at time, especially since it's **after dinner** time and food is considered an essential commodity.

[WMAP-16] "Order together" option doesn't divide equally

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Low
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 5G Android 13. Wolt version 24.42.0		
Severity:	Low		

Description

Steps to replicate:

- 1- Enter the app and select location- “Hazfira 27 Tel Aviv”.
- 2- Choose any restaurant, for example, “Favela Givatayim”.

- 3-Select the icon of people with the + sign, then wait for the “order together” title to appear.
- 4- Try to split the order sum equally between 2-10 people.

Actual Result- Users can't change the default option, which is for the host to pay the entire sum.

Expected result- Users should be able to divide the entire sum by the amount of people ordering together or other configurations.

[WMAP-25] Store in "Deli" tab not entirely relevant

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Lowest
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 Android 13. Wolt version 24.42.0		
Severity:	Low		

Description

1-Enter the “Discovery” section.

2-Swipe left until you reach the “Deli” tab and select it.

3- Scroll down until you see the “Basher Fromagerie” store and click on it.

4- Look for meat products.

Actual Result- “Basher Fromagerie” store has no meat products, therefore sorting in the “Deli” category can be confusing.

Expected result- The store should be in a different tab for cheeses, etc, not meat.

Attachments:

16:09 •

[WMAP-26] [Store in "Fruit and Vegetables" tab not entirely relevant](#)

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Low
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 5G Android 13. Wolt version 24.42.0		
Severity:	Low		

Description

Steps to replicate:

- 1-Enter the “Discovery” section.
- 2-Swipe left until you reach the “Fruit & Vegetables” tab and select it.
- 3- Scroll down until you see the ”Hamanya” store and select it.
Search for Fruit or vegetables in the store.

Actual Result- The store sells barely any fruit options or vegetables. Instead, it focuses on nuts and pasta, and this can be confusing for users.

Expected result- This store should be under a different tab such as dried goods to prevent confusion.

Description

1-Enter the “Discovery” section.

2-Swipe left until you reach the “Erotic Products” tab and select it.

3- Scroll down until you see the “Black Box TLV” store and click on it.

4- Search for standard Erotic products.

Actual result- Products are mostly dating cards, therefore sorting in the “Erotic Products” category can be confusing.

Expected result- The store should be in a different tab.

[WMAP-29] [Sushi "Chimera" allows selecting No changes, then allows changes](#)

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Lowest
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 5G Android 13. Wolt version 24.42.0		
Severity:	Low		

Description

Steps to replicate:

- 1- Select location “Ramat Gan, Herzl 58”
- 2- Select Restaurants, then select “Sushi Bar Chimera”.
- 3- Choose “Portobello Bun” option.
- 4- Select “No changes”, then select “No Jalapeno”.
- 5- Go to checkout and confirm.

Actual result- When selecting “No changes” the app still allows adding the “No Jalapeno” change and ordering it.

Expected result- The app should forbid the users from making any further changes as they selected the “No changes” option.

Attachments:

The screenshot shows a mobile application interface for ordering food. At the top, there's a header bar with the time (21:10), signal strength, battery level (71%), and a search bar containing the text "Chimera Sushi Bar". Below the header, the main content area displays a meal item:

Portobello Bun ← (Red arrow pointing to the item name)

41.00 ₪ (Price) ← (Red arrow pointing to the price)

Steamed bun, filled with mushroom and leek burger, lettuce, pickled daikon, jalapeno aioli and sweet soy sauce

Changes
You've chosen the maximum

1 No Changes ← (Red arrow pointing to the first change option)
1 No Jalapeño ← (Red arrow pointing to the second change option)

No Changes should prevent changes

At the bottom, there are buttons for quantity adjustment (-, 1, +) and a large blue "Add to order" button with the price "41.00 ₪".

[WMAP-32] Restaurant closing soon, shouldn't be displayed

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Medium
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 5G Android 13 Wolt version 24.42.0		
Severity:	Medium		

Description

Steps to replicate:

- 1- Enter the app at 22:30 ILS and in it, input the address “Brurya street 6”.
- 2- Select the “Discovery” tab, then select “Street food”.
- 3- Scroll down until you see the “Greenberg Burger” option, with the “Closing soon” headline and 50-60 minutes delivery time.

Actual result- The app shows the users an option to order from a place that's closing within minutes and requires an hour on average to deliver. But that option is barely possible, so should it be displayed at all?

Expected result- The app should automatically hide restaurants that are closing within minutes and require a longer delivery time, in order to minimize confusion and frustration from users.

A top-down photograph of various raw meat and seafood cuts on a dark, textured surface. From left to right: a small bowl of red peppercorns, a large piece of salmon fillet, a ribeye steak with prominent marbling, and a long, thin chicken breast. Fresh rosemary sprigs are scattered around the meat, and a whole garlic bulb is visible in the bottom right. In the top right corner, there is a white outline of a heart shape.

[WMAP-40] [Restaurant listed under Vegan is offering Chicken](#)

Created: 14/11/24

Status:	To Do		
Project:	Wolt Mobile App Project		
Type:	Bug	Priority:	Lowest
Reporter:	Yaniv R	Assignee:	Yaniv R
Resolution:	Unresolved		
Environment:	OnePlus Nord2 Android 13. Wolt version 24.46.0		
Severity:	Low		

Description

1-Enter the “Restaurants” section.

2-Select the “Vegan” tab and scroll down until you reach “Pizza Porto” restaurant.

3- Scroll down to the salad section and view what changes are possible.

Actual result- The restaurant has in its picture, a pizza with anchovies which isn't vegan. In addition, under the salad section the following statement appears: “Extra chicken is optional for an additional charge”. I'm pretty sure that goes against being Vegan and could be viewed as misleading information.

Expected result- If this restaurant is listed under the “Vegan” tab, no picture or non-vegan food options should be included, as it could cause health and ethical issues to this populations.
